## 10 Tips For Getting Your Kitchen Lighting Right

Since the kitchen is where most families spend the bulk of their time, it's important that the space is designed just right, especially when it comes to lighting. We asked top designers for their advice on kitchen lighting design, from must-haves to problems to avoid.

"Leave the task lighting to the invisible under-cabinet and recessed fixtures, and select beautiful, interesting fixtures for the ceiling and over the bar. I prefer antique or vintage pieces. Let these be jewelry for the room, providing an ambient glow for those times when the party (inevitably) ends up in the kitchen."
